Functional Cabin Filter

Take Your Air Quality to the Next Level!

With our 40 years of experience and advanced R&D efforts, our specially enhanced SafeAir air filters, developed for our 40th anniversary, elevate your travel experience to the next level!

With its special alloy-based formula and 3-layer structure, the SafeAir Functional Cabin Filter prevents the formation of bacteria, mold, and harmful microorganisms by up to 96% more effectively compared to standard cabin filters

3
LAYER

It provides active protection against allergens and similar elements that increase especially during the spring season, while ensuring a clean airflow into the passenger cabin.

For your family, it offers a pleasant travel environment with its superior filtration capability that protects against everything from unpleasant outdoor odors to fine dust, and a healthy living space with its antibacterial technology that effectively prevents bacterial growth.

Tested and approved according to ASTM E2149:2020 standards.

The coolest member of our family
Enjoy the freshness of clean air with SafeAir!

Why SafeAir? / Key Features

Versatile Filtration: Our functional cabin filter effectively filters particles such as dust found in standard filters, as well as pollen, harmful microorganisms, and various allergens.

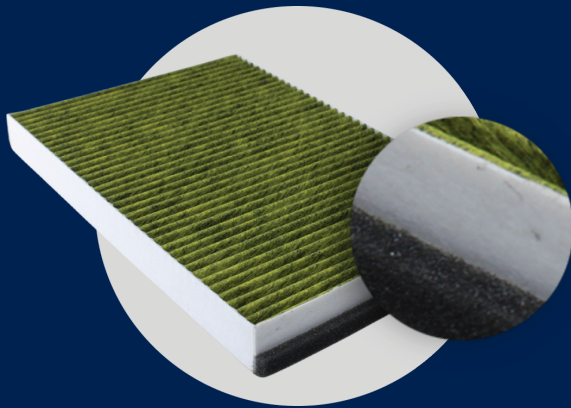

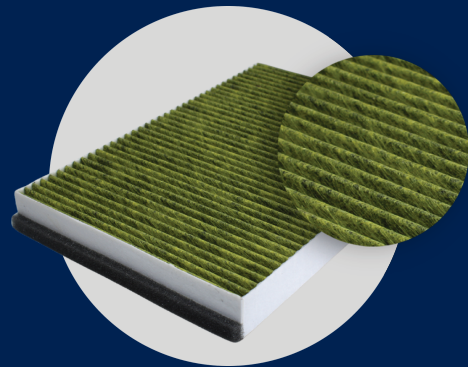

Antibacterial Technology: The superior filtration technology developed as a result of research conducted at our R&D center has endowed standard PES cabin filters with antibacterial properties.

Effective Bacteria Prevention: Antibacterial activity tests applied to the filter have proven that Şampiyon SafeAir Cabin Filters effectively prevent bacterial growth.

Quality Standards: Accredited organizations that evaluate antimicrobial and antiviral effectiveness are involved in the development of our product.

PARTICULATE FILTER LAYER

It is the first and highly efficient filter layer that helps clean the air by trapping a large portion of particles

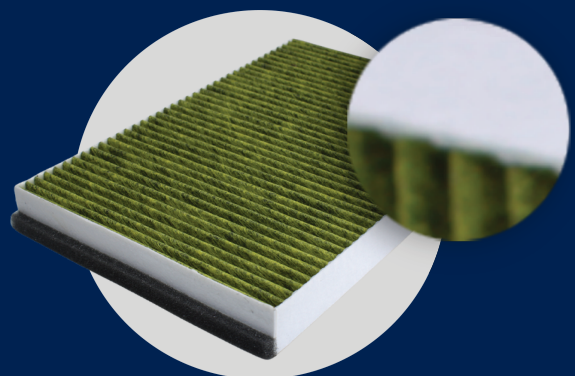

ACTIVE CARBON LAYER

Composed of active carbon granules, this layer cleans the air by absorbing harmful gases such as ozone, sulfur dioxide, and nitrogen oxides, as well as unwanted odors.

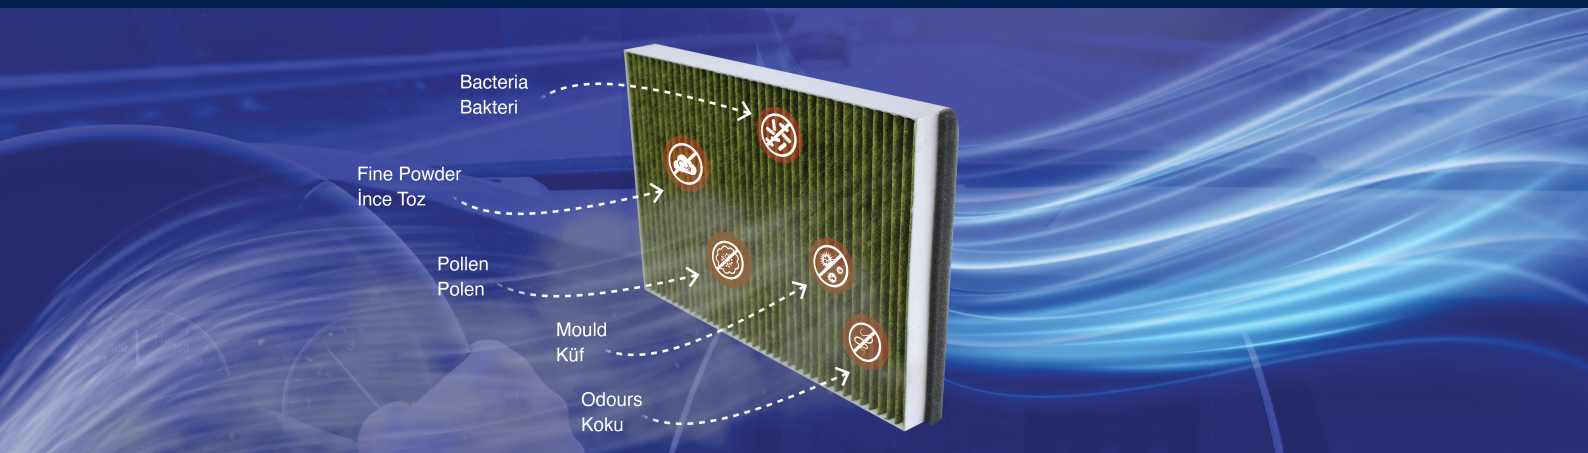

FUNCTIONALIZED LAYER

It is the first and highly efficient filter layer that helps clean the air by trapping a large portion of particles such as dust and pollen found in the ventilation system.

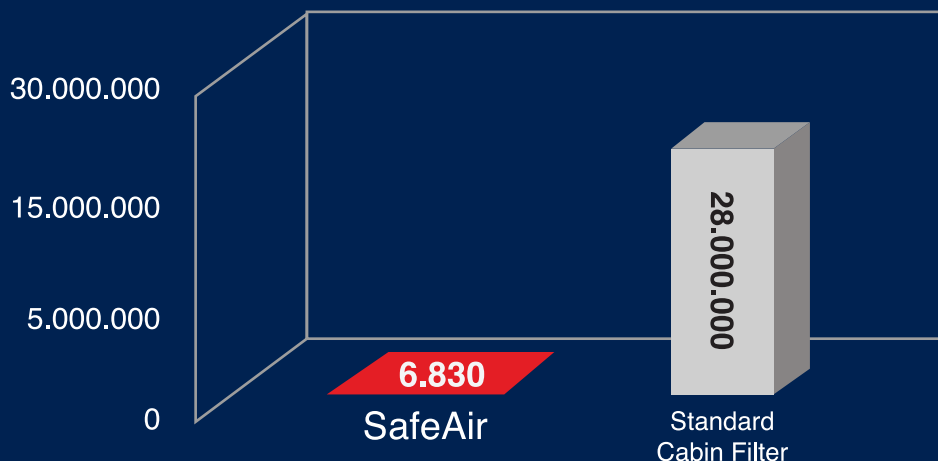

Benefits	SafeAir CK 0000 B	Carbon CK 0000 K	Standard CK 0000
Provides over 96% protection against bacteria	★		
Prevents mold and bacterial growth in the filter	★		
Eliminates nearly 90% of odors	★	★	
Traps harmful gases such as ozone, nitrogen oxides, and sulfur dioxide	★	★	
Filters out nearly 100% of small particles	★	★	★
Protects the air conditioning system	★	★	★
Enhances driving comfort	★	★	★

- 1 Polyester Filtering Surface:** This surface filters the air taken from the outside environment and releases it into the vehicle cabin. It prevents dust, pollen, and other particles from the outside environment from entering the vehicle, providing a cleaner and more comfortable driving experience.
- 2 Active Carbon Surface:** The surface, with the ability to absorb harmful gases and unpleasant odors in the air, both improves air quality and provides a healthier living environment.
- 3 Functionalized Surface:** This technology, proven to prevent the growth of bacteria and microorganisms by more than 96% according to tests conducted in accordance with ASTM E2149:2020 standards, offers protection against allergens and reduces the risks of respiratory diseases, thereby improving quality of life

24 hour bacterial growth count

It has been conducted based on the ASTM E 2149-2020 standard
